Are you looking for an exciting opportunity to fast track your career?

Our global EdTech client provides an opportunity to make a difference in the lives of millions of teachers, students, and parents.

**Offering above-average wages and qualification for a signing bonus\***

We are looking for a skilled, senior Node.js developer to play an important role in setting the company's strategy and technology direction to position for future growth. In this position, you will be part of a team building anew product from the ground up.

You must be strong team player that sees the big picture, willing to get hands on with the product development and have a background as a Node JS back-end developer and have good knowledge of front-end technologies.

### Responsibilities;

- Help design the platform architecture
- Get hands on with ITOps including setup, and management of dev, staging and production hosting infrastructure
- Develop the required backend and middleware for MVP launch
- Work with the CEO and other contributors across the organization such as Development Team, Marketing, Business Development and Operations to define and deliver new products and enhancements
- Track, analyze and monitor technology performance metrics
- Represent the technological agenda in leadership meetings and be responsible for the delivery of software, including velocity and quality

### Mandatory Skills;

- Outstanding English verbal communication
- Strong interpersonal and leadership skills, including fluent English
- Excellent back-end development using NodeJS with micro services architecture
- Release management functionality with GIT, Jira, Confluence
- A clear vision of what a successful product, design and engineering organization looks like and how to achieve it
- Previous working experience as a back-end developer for a minimum of 5 years
- Strong education in computer science or similar relevant field
- In-depth knowledge of web systems architecture, design, and development
- Hands on experience with complex project management
- Excellent organizational and time-management skills
- Proactive problem solver
- Attention to details

### Bonus/Non-Essential Skills;

- Full stack developer with strong front-end skills with **React**
- Understanding of communication APIs like Twilio, Zoom, or similar
- Experience working with AWS and IT system
