

We are looking for a **QA Engineer**

Sydpro is Australia's premier remote staffing provider with a satellite office in Colombo, Sri Lanka that began operations in 2014 with the aim of introducing the cream of Sri Lanka's ICT workforce, to contribute meaningful value to our Australian, USA and Ireland client base.

Are you looking for an exciting opportunity to fast-track your career?

The candidate selected to join the team will have an opportunity to make a huge difference in the lives of millions of university students. Helping students to make the right course selection, uncover hidden degree opportunities, graduate earlier, and ultimately reduce their student debt. We are looking for a Quality Engineer who will work as part of our technology team. In this position, you will be responsible for the overall quality of the platform. You must be a strong team player who sees the big picture and is willing to get hands-on.

The right individual will enjoy working in a fast paced environment alongside a team of experienced professionals and will be offered above market salary conditions and a range of employee benefits.

Responsibilities;

- Establish and design Quality Engineering Architectural solutions.
- Lead efforts in automated and manual test strategies, test planning, execution, and reviews.
- Ensure consistency and quality in automated testing delivery.
- Work closely with the teams to identify new automation opportunities. Review and contribute towards the development of automation scripts.
- Improve and maintain test automation frameworks.
- Configure and maintain continuous integration.
- Overlook and manage test execution and communicate test statuses to stakeholders.
- Keep current with advances in automation methodologies and tools.
- Work with the CPO, development lead, other members of the product development team.

Skill Requirements;

- A Bachelor's degree or equivalent qualification, and 3+ years of experience designing, developing, maintaining, and executing automated testing solutions.
- Proficiency in one or more programming languages.
- Familiarity with software QA principles, processes, methods, framework, and test automation tools (e.g., JUnit, TestNG, Selenium, Appium etc.).
- Experience in implementing test automation frameworks and expertise in testing mobile applications in various platforms, including Android and iOS.
- Experience in working with continuous integration, build, and source control tools such as Jenkins and GIT.
- Hands-on experience in the testing middle tier and service-oriented architectures using Rest-Assured.
- Hands-on experience in performance testing using JMeter.
- Experience working closely with developers, test engineers, and support staff to troubleshoot and resolve technical issues.
- Understanding of test-driven development.
- Outstanding communication, interpersonal, and leadership skills, including fluent English.
- Excellent organizational and time-management skills.
- Proactive problem solver.
- Attention to detail.

An attractive salary package awaits the right candidate
